disposal site is working out fine, Center Lake cutting has not yet started; Procedure to be followed regarding the Priority Watershed Project approval; CCLRD is a member of Wisconsin Association of Lake Districts (WALD) <http://www.dnr.state.wi.us/org/water/fhp/lakes/onceupon.htm> ; no wake ban was imposed by the Town of Salem until July 7; there has been an increase in boaters because of Silver Lake's Launch fee; Boat Route on Center Lake is COUNTER clockwise because of the peninsula; new Center Lake boat ramp is being considered on the North Shore and a comment that a cement pier should be considered; James R Freschette presents a proposal for about \$1500 to which the commissioners agreed. CCLRDM-141-144, 146

~ 1993 July 23 1993 Commissioners Meeting Salem Town Hall, weed harvesting produced 48-50 tons of weeds from Camp Lake and harvesting in Center Lake concentrated on the channels and the South and North ends, since water has been high; Ron Schaetten has followed thru and applied for and received a grant from ASCS; Ron suggested that He install the fence himself along with some extra corner posts to keep tension on the wires; the project is \$1100 less than the original plan resulting at \$2533.09; the Aquatic Plant Survey is progressing whereby Vince Moska has found 25 different species of plants on Camp Lake; Center Lake to be assessed next week; new DNR sign at Camp Lake Boat Launch to be up shortly; James

Freschetter to provide accounting and budgeting services for the Lake District and to include providing a chart of accounts, develop a budget document, take our data and load it into provided format and attend the annual meeting to entertain any questions about the new budget format which will satisfy the law which requires that we set up the budget with this format; the resulting budget will look like the Town of Salem's budget running the calendar Jan 1 to Dec 31 which is different than the previous September 1 thru August 31; Florence Malizola, Secretary receives \$300 as salary; Camp Lake Dam Project continues with a necessary study to determine the effect of high water, to repair or rebuild, approval of DNR, Hydrology and Hydrolic Study to be done for the first time; Center Lake Boat Launch again is discussed for 7 parking spaces for cars and trailers will be \$25000, where half would come from the Dingle Johnson State Grant funds and the balance will be split with the Town of Salem and CCLRD and will be on the North side of the channel at 93rd street and Lakewood Terrace. CCLRDM-146-148

~ 1993 June 26 1993 DNR nominates CCLRD for award as a priority lake project

## Lake project award sought

The Department of Natural Resources (DNR) Southeast District, Priority Watershed/Lake Selection Committee, selected Camp Lake/Center Lake Rehabilitation District (CCLRD) for nomination as a priority lake project in 1994. Priority lake projects are designed to identify sources of watershed pollution and offer state cost-share dollars to install best land management practices to stop nonpoint pollution.

CCLRD chairman, David Giza, together with a team of three representatives from Kenosha County Land Conservation Committee, one representative from R.A. Smith & Associates and Shirley Boening, chairman, town of Salem, gave a 30-minute presentation to the selection committee at DNR. CCLRD competed against Eagle Spring Lake and Lulu Lake from Waukesha and Walworth counties.

Extra copies of the CCLRD prior-

ity lake project application are on file at the Salem Town Hall and may be examined by the public during normal business hours.

The next step in the nomination/award process is for Gloria McCutcheon, district director DNR, to support and then forward the recommendation of the committee to the Water Resources Management Bureau, Madison, for further review. In September a final selection will be made by the secretary of DNR and the secretary of the Department of Agriculture, Trade and Consumer Protection.

For more information, call Ruth Johnson, southeast district lake management coordinator, 263-8663. CCLRD will provide an update on the selection process at its annual meeting, which will be held at 10 a.m. Saturday, Aug. 28, Westosha Central High School, 24617 75th St. (Highway 50), Paddock Lake.

## County Lake Assn. proposed

By Jim Rohde  
Staff Writer

BRISTOL — Lake District representatives agreed Saturday to take the first steps toward forming a countywide lake association.

They will meet informally for the dissemination of information as a prelude to the possible formation of the association.

Organized by Jon G. Hanken, Community Development Agent with the University of Wisconsin-Extension, representatives of four of the seven lake districts met at the new County Center in Bristol with Lisa Conley, president of the Wisconsin Lakes Association and the Waukesha County Lakes Association; Robert Wakeman, Department of Natural Resources; Pamela Wallis, Kenosha County Land Conservationist, and Wayne Faust, Waukesha UW-Extension and a representative of the Waukesha County Lakes Assn.

Represented were George Lake District; Camp-Center Lake District; Twin Lakes Rehabilitation District, and the Voltz Lake District. Missing were representatives from Paddock Lake, Powers Lake, and Hooker Lake Districts.

Hanken said countywide lake associations, which got their start in Polk County, have since been formed in Dane, Dodge, Forest, and Waupaca Counties, as well as Waukesha, as a means of sharing information among individual lake protection districts and for the pooling of grant monies.

"I realized how many organizations were concerned only about their own lakes and felt

if we could only use each other's knowledge, everyone would benefit," Conley said. "Working on a countywide basis we can be on top of development and learn how land use affects water quality in our lakes."

Faust said the key to forming a county lake association and making it viable was leadership. He said the Waukesha group was established as a not-for-profit organization so that it could operate outside the constraints of government.

He said as a lake association you can seek and receive money, not only from the state, but from private foundations and individuals which are willing to make donations for lake protection.

"There are funds available, you just have to know where to get them," Faust said.

Wakeman said the essence of countywide lake districts is getting people exchanging information. He said as one of only two lake managers looking over southeastern Wisconsin's 320 lakes, it was important to help in forming self-help programs because of the importance of volunteers.

He said the biggest problem facing inland lakes in Wisconsin was user conflicts between fishermen, boaters, water skiers, swimmers and jet skiers.

Conley said Waukesha's county lake association started as a task force of lake districts within the county and evolved into an organization. "We wanted to keep talking with each other after the work of the task force was completed," she said.

~ 1993 August 28 1993 FIFTH ANNUAL CCLRD  
MEETING Central High School, Final Approval is near  
at hand of the Priority Lake Project and this is the  
first time that Kenosha County has ever gotten a

Priority Lake Project; Camp Lake Dam proposal has been prepared and presented by R A Smith and Associates; Dredging Study took 3 years to complete and the end result is that we cannot make a 3 to 6 foot lake into a 10 to 15 foot lake; overview of the Aquatic Plant study given by Vince Moska; A Flood Plain study initiated by the County Office of Development and Planning and commissioned SEWRPAC to delineate the flood plain because permits were being issue to people in the flood plain. The 50-60 properties affected were never notified individually but a Public Hearing was held in November which satisfied the legality of it in the County's mind. Shirley Boening explained that flood plain property was nondebatable. She had talked to George Melcher who was willing to talk and set up a public meeting with possible other options. It was commented that the process was a defective process because we (CCLRD) did not know about it. There is an appeal process, It was suggested that different options can be looked at, as flood fringe, floor flow, floodway since we do not want to loose the evaluation of those lands in either the Town or the District; membership agreed that any monies that are not used on weed harvesting be held for the purchase of our OWN harvester. CCLRDM-151-154

~ 1993 September 19 1993 Kenosha Today FLOOD PLAIN TO BE REZONED by Joe Van Zandt reports

that 100 people attend a meeting at the Center Lake Woods Community Center where Robert Biebel discussed flood plain reclassifications which introduces restrictions on septic, rebuilding due to loss, limits on remodeling including decks and porches and limits on using fill to raise property levels; flood-plain fringe district to be created around the two lakes whereby the owners could make building improvements.

CCLRD1-176

~ 1993 September 22 1993 Chairman David Giza confirms to the Southeastern Wisconsin Regional Planning Commission that the CCLRD is petitioning the DNR to transfer ownership of the Dam to the CCLRD and then to replace the dam to maintain a permanent water elevation of 740.6 feet above sea level; that the CCLRD is requesting a proposal from SEWRPC to perform a hydraulic and hydrologic evaluation of Camp Lake. own, he said, the remainder of the lodge is still structurally sound, even though it dates back to the 1850s.

As for what remains of the old Aquilla Lodge, Kozie said he is looking for a buyer who has the energy and money required to remodel and reopen the lodge. Otherwise, the rest of the building will eventually have to be razed well.

re days

The Chicago School Finance Authority, which has fiscal oversight over the nation's third-largest public school system, challenged the latest extension of Kocoras' order, and U.S. Appellate Judges Richard A. Posner, William J. Bauer and Richard D. Cudahy ruled in the authority's favor.

## Lake districts may organize

### Kenosha groups hear lake concerns

By Jim Rohde  
Staff Writer

BRISTOL — A county association of lake management districts appears likely following Wednesday's meeting of representatives from six of Kenosha's eight lake protection districts.

The district representatives have been meeting with Jon G. Hanken, community development agent at the University of Wisconsin-Extension.

"I've talked with representatives of all the county districts, and none of them expressed opposition to it," Hanken said following positive comments from those in attendance. "But I would like to see it much broader to include lake associations, sportsmen's organization and any other groups concerned about our lakes."

Hanken said he would provide copies of the Waukesha County Lake District by-laws to each district representative in order for the organization process to begin.

"It will be a way of bringing lake districts together for an exchange of ideas, educational programs, and possibly joint purchasing," Hanken said. "It could also provide the format for addressing problems of the lake management districts, particularly with the growth occurring throughout the county."

Dennis Bloomquist, 10135 115th Ave., a member of the George Lake District, said while they support the concept, they want to know the goal of the county association.

"We are also concerned about the cost," Bloomquist said. "As long as it's a volunteer organization, we're in favor of it."

Tim Arnison, 6418 238th Ave., Paddock Lake District, said they realized that the power of numbers might be beneficial in getting changes, both from the county and the state.

Geoffrey Wheeler, 24510 84th St., of Hooker Lake Management District, said a county lake association could be both an educational and informational resource organization.

Hanken said the cost for submitting incorporation papers is approximately \$100.

"The Waukesha County Lake Association charges its member districts \$50 a year," he said.

The group set Jan. 11 for its next meeting to review the Waukesha by-laws and to discuss the next step in forming the association.

In other action, Hanken said the College of Natural Resources, Stevens Point, is interested in developing educational programming and news articles to better inform residents of lake district organizations on a monthly basis.

# Watershed project awarded

The Camp Lake/Center Lake Rehabilitation District (CCLRD) has received an affirmative nod from the Wisconsin Department of Natural Resources (DNR) to begin a priority watershed project.

Expected to take 10 years, the DNR expects to begin the project at the start of the new year, beginning with a strategic plan of action.

Grant funds are anticipated to be available to cost share installation of

non-point source controls with landowners and municipalities.

The project will seek to discover and alleviate those who may be inadvertently polluting the water with sediments or chemicals. That may include farm manure runoff or areas without a sewer run-off system.

CCLRD has been a forerunner in aggressively approaching the improvement and protection of the lakes water quality.

## Camp/Center Lakes awarded DNR project

Camp Lake and Center Lake will be part of a Department of Natural Resources (DNR) project to reduce water pollution.

The watershed will be declared a priority watershed project by the DNR. The goal is to reduce nonpoint water pollution of the watershed.

The project will begin soon after Jan. 1, implemented by both the state and local governments. Participating groups include the Camp Lake/Center Lake Rehabilitation District (CCLRD).

Local legislators, including state Rep. Cloyd Porter and state Sen. Joe Andrea, helped in the application process by writing letters of support and lobbying state officials.
